

Assalaamualikum, my name is Alia and I joined the Quran class half way into surah baqarah. We all know that reading the Quran is very important. Each word we read we are rewarded 10 times. I also understand and acknowledge that we need to understand and apply what we read. This Quran is our guidance and our manual of how to live our life. Without understanding it we can not fully give it it's due respect. The Quran is amazing! I have attended Quran tafseer a few times in the past. I would attend in Ramadan where we would finish the tafseer in one month.. Alhamdulillah. The most amazing thing I have experienced is you can never get enough and you can never say you

understand it all. Each time you hear the tafseer you take back something new, something you didn't perhaps fully understand perviously. It's like the ocean, the deeper you go the more jewels and treasures you find Subhan Allah. I have also heard tafseer in a class setting face to face and I have also heard it via whatsaap or YouTube. Even though all these means are a great way to connect yourself to the Quran, I personally feel the face to face setting is most beneficial. Being able to interact and having an instructor or teacher periodically ask questions and boggle your mind makes it easier to understand. I am grateful to Allah Subhana watala for bringing me to this class because truly it is only in Allah's

hands for me to have joined it. May Allah
give us Allah hidaya and taufeeq to
understand and apply what we learn
Ameen. Aalia Aziz!
