

Aslam walikum wrwbr I tried to learn Quran by myself most of my life. I thought I understood a lot and I was proud of it because most of the people around me had never read the Quran with its translation . So I felt I know a lot . Since I now learnEd the Quran from teachers little by little, I feel now that I didn't know anything before either. Alhumdolilaha I am learning with Ustaza ji and with my other lovely teacher in the class so its a totally different experience that I feel in my heart feel. I feel so much peace when I am in class and I feel everything goes to my heart. Being in a classroom environment with other students is the perfect way to learn any thing any educational but learning the book of Allah in a class in such a beautiful way with other people is an amazing experience of my life . We all should take this opportunity for granted and attend classes on a regular basis and enjoy the beauty of Quran MA.
